

## New introductions from shows in London, New York and Austin

### Cookie Cutters

[missetoile.dk](http://missetoile.dk)

A range of 21 cookie cutters from Miss Étoile, a Danish brand designed by Anne Lassen. Miss Étoile is Lassen's fictional muse, a glamorous creature surrounded by beauty, living in her elegant Paris apartment. The cookie cutters—a teapot, a butterfly, an umbrella, the Eiffel Tower and many more—are just part of a new range of cake, cookie and pastry accessories.

### Crystallized Flowers and Herbs

[gourmetsweetbotanicals.com](http://gourmetsweetbotanicals.com)

Made with only two ingredients each—the main flavor and sugar—these flower and herb crystals add both intense flavor and a satisfying crunch to all types of sweet and savory dishes, as well as beverages. Shelf-stable and Kosher certified, the four flavors shown here—rose, basil, fennel and mint—are the first of a fuller range that Fresh Origins plans to introduce in the coming year.

### Blonde Chocolate and More

[valrhonaprofessionals.com](http://valrhonaprofessionals.com)

Dulcey is a new couverture from Valrhona which the company has dubbed a 'blonde' chocolate. It is distinguished from white chocolate by its toasted biscuit flavor with hints of caramelized milk and a touch of salt. Its unique color and flavor profile is a pleasing contrast to Valrhona's latest white chocolate introduction, Opals, the truest white chocolate on the market.

### Flavor Library

[koerner-co.com](http://koerner-co.com)

An epicurean indulgence or a professional investment—this 192-piece flavor kit is both. A range of essential oils, in flavors that cover a wide range of fruits, nuts, herbs, flowers, roots, vegetables, spices and much more, is packaged in individual .25 oz. bottles. The oils are water-soluble for easy addition to any recipe.

### Re-usable and Biodegradable Mold Material

[composimold.com](http://composimold.com)

Made of 100% natural ingredients, Composimold gives

sugar artists the ability to mold and remold more than 40 times from just one 20 oz. container. Composimold is compatible with sugar, chocolate and other edible casting materials, picks up fine detail and requires no weighing or mixing. When no longer usable Composimold biodegrades in an aqueous environment.
